Using everyday, easy-to-grasp examples to reinforce basic concepts, this highly regarded handbook remains the standard introduction to meteorology and the atmosphere – components, problems, and applications. Includes the most up-to-date coverage of topics such as: ozone depletion; the ultraviolet index; temperature; dew point temperature and orographic effects; wildfires and weather; thunderstorms and lightning; the record-breaking Florida hurricane season; effects of air pollution, and more. Incorporates top-quality visuals, including new satellite images and illustrations by the award-winning Dennis Tasa, to demonstrate the highly visual nature of meteorology. Uses a largely non-technical writing style to help readers grasp important concepts. For those interested in learning more about meteorology.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. xxxxxxxxx Perfect for use with any Earth Science text, this versatile collection of introductory-level laboratory experiences examines the basic principles and concepts of the Earth sciences. Widely praised for its concise coverage and dynamic illustrations by Dennis Tasa, this full-color laboratory manual contains 23 step-by-step exercises that reinforce major topics in geology, oceanography, meteorology, astronomy, and Earth Science. The new Eighth Edition works with MasteringGeology to improve student preparedness through video and pre-lab assignments and to allow instructors to easily assign and assess student lab performance.

This workbook/study guide is organized by chapter and includes chapter summary, important concepts, self-test true/false, multiple choice, and essay type questions and answers. A list of additional suggested reading material is also included to further enhance student understanding of the subject.

The Seventh Edition of Zumdahl and DeCoste's best-selling INTRODUCTORY CHEMISTRY: A FOUNDATION that combines enhanced problem-solving structure with substantial pedagogy to enable students to become strong independent problem solvers in the introductory course and beyond. Capturing student interest through early coverage of chemical reactions, accessible explanations and visualizations, and an emphasis on everyday applications, the authors explain chemical concepts by starting with the basics, using symbols or diagrams, and conclude by encouraging students to test their own understanding of the solution. This step-by-step approach has already helped hundreds of thousands of students master chemical concepts and develop problem-solving skills. The book is known for its focus on conceptual learning and for the way it motivates students by connecting chemical principles to real-life experiences in chapter-opening discussions and Chemistry in Focus boxes. The Seventh Edition now adds a questioning pedagogy to in-text examples to help students learn what questions they should be asking themselves while solving problems, offers a revamped art program to better serve visual learners, and includes a significant number of revised end-of-chapter questions.
